Advantage

**All-in-one Food
Quality Monitoring**

Protect your customers and your brand.

The PAR SureCheck® Advantage is an IoT (Internet of Things) mobile solution designed for food quality and task management. The Advantage features the latest in Intel® architecture allowing for the integration of multiple functions in an all-in-one device.

Combined with SureCheck SaaS (Software-as-a-Service), the Advantage assures Hazard Analysis & Critical Control Points (HACCP) compliance while improving operational efficiencies by 60% (compared to traditional pen and paper). In addition, SureCheck connects to a cloud-based enterprise server for maintaining accurate records for auditing and analytics.

High Performance

The hardware device, powered by Intel® Atom™ Processor technology, offers high performance with low power consumption, allowing for up to 10 hrs of battery life. The device also provides increased operational efficiencies with its integrated temperature probe, bar code scanner and RFID infrared temperature reader.

Ruggedized Device

The Advantage is designed and built for harsh environments. The device has an IP66 rating with a 1.5 meter drop spec which means the device is both water and drop resistant.

Weight .617 lbs.

Operating System	Android
Capacity	32 GB
Processor	Intel® Atom™
Memory	2 GB
